No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

# Contents of Volume 93

NUMBER 1, FEBRUARY 1979

DAWES. Functions of Baseplate Components in Bacteriophage T4 Infection. III. The Functional Organization of the Baseplate .....	1
JURKOVIČOVÁ, J. H. VAN TOUW, J. S. SUSSENBAUGH, AND J. TER SCHEGGET. Characterization of the Nuclear Polyhedrosis Virus DNA of <i>Adoxophyes orana</i> and of <i>Barathra brassicae</i> .....	8
CALYN D. HOELZER, RAY B. FRANKLIN, AND HENRY R. BOSE, JR. Transformation by Reticuloendotheliosis Virus: Development of a Focus Assay and Isolation of a Nontransforming Virus .....	20
OTO NAKAMURA AND RICHARD W. COMPANS. Biosynthesis of the Oligosaccharides of Influenza Viral Glycoproteins .....	31
IRVIN S. REITZ, JR., JANE C. LUCZAK, AND ROBERT C. GALLO. Mapping of Related and Nonrelated Sequences of RNA from Woolly Monkey Virus and Gibbon Ape Leukemia Virus .....	48
LLIAM W. HAUSWIRTH AND KENNETH I. BERNIS. Adeno-Associated Virus DNA Replication: Nonunit-Length Molecules .....	57
UCE W. STILLMAN AND ALAN J. D. BELLETT. An Adenovirus Protein Associated with the Ends of Replicating DNA Molecules .....	69
DOLF JAENISCH. Moloney Leukemia Virus Gene Expression and Gene Amplification in Preleukemic and Leukemic BALB/Mo Mice .....	80
URENT ROUX AND JOHN J. HOLLAND. Role of Defective Interfering Particles of Sendai Virus in Persistent Infections .....	91
O. DAWSON AND J. L. WHITE. A Temperature-Sensitive Mutant of Tobacco Mosaic Virus Deficient in Synthesis of Single-Stranded RNA .....	104
BERT C. NOWINSKI, MARK E. LOSTROM, MILTON R. TAM, MARY R. STONE, AND W. NEAL BURNETTE. The Isolation of Hybrid Cell Lines Producing Monoclonal Antibodies against the p15(E) Protein of Ecotropic Murine Leukemia Viruses .....	111
NDRA SILVER, AKIKO TANAKA, AND MEIHAN NONOYAMA. Transcription of the Marek's Disease Virus Genome in a Nonproductive Chicken Lymphoblastoid Cell Line .....	127
ERGEN LOHMEYER AND HANS-DIETER KLENK. A Mutant of Influenza Virus with a Temperature-Sensitive Defect in the Posttranslational Processing of the Hemagglutinin .....	134
INON HIZI, WERNER WUNDERLI, AND WOLFGANG K. JOKLIK. Purification and Partial Characterization of a Protein Kinase from the Prague-C Strain of Rous Sarcoma Virus .....	146
ENZ SCHWARZ, PETER J. FISCHINGER, JAMES N. IHLE, HEINZ-JÜRGEN THIEL, FRANK WEILAND, DANI P. BOLOGNESI, AND WERNER SCHÄFER. Properties of Mouse Leukemia Viruses. XVI. Suppression of Spontaneous Fatal Leukemias in AKR Mice by Treatment with Broadly Reacting Antibody against the Viral Glycoprotein gp 71 .....	159
KIB AL ANI, PIERRE PFEIFFER, GENEVIÈVE LEBEURIER, AND LÉON HIRTH. The Structure of Cauliflower Mosaic Virus. I. pH-Induced Structural Changes .....	175
KIB AL ANI, PIERRE PFEIFFER, AND GENEVIÈVE LEBEURIER. The Structure of Cauliflower Mosaic Virus. II. Identity and Location of the Viral Polypeptides .....	188
AKAN PERSSON, BERIT MATHISEN, LENNART PHILIPSON, AND ULF PETTERSSON. A Maturation Protein in Adenovirus Morphogenesis .....	198
SALZBERG, A. HELLER, M. ABOUD, D. GURARI-ROTMAN, AND M. REVEL. Effect of Interferon on Human Cells Releasing Oncornaviruses: An Assay for Human Interferon .....	209
INORI ISHIMOTO, JANET W. HARTLEY, AND WALLACE P. ROWE. <i>Fv-1</i> Restriction of Xenotropic and Amphotropic Murine Leukemia Virus Genomes Phenotypically Mixed with Ecotropic Virus .....	215
ARGUERITE VOGT. Properties of "Mink Cell Focus-Inducing" (MCF) Virus Isolated from Spontaneous Lymphoma Lines of BALB/c Mice Carrying Moloney Leukemia Virus as an Endogenous Virus .....	226
CHARD J. SALO AND HEATHER D. MAYOR. Adenovirus-Associated Virus Polypeptides Synthesized in Cells Coinfected with either Adenovirus or Herpesvirus .....	237
NTHONY C. H. DURHAM AND J. B. BANCROFT. Cation Binding by Papaya Mosaic Virus and its Protein .....	246
SHORT COMMUNICATIONS	
MOUNIR ABOUHAIDAR AND J. B. BANCROFT. Sequential Encapsidation of Heterologous RNAs with Papaya Mosaic Virus Protein .....	253
ABRAHAM YANIV AND ARNONA GAZIT. Characterization of a Murine Myeloma (MOPC-315) C-Type Virus by Nucleic Acid Hybridization .....	256
PIER FRANCO PIGNATTI, ENZO CASSAI, GUERRINO MENEGUZZI, NICOLE CHENCINER, AND GABRIELE MILANESI. Herpes Simplex Virus DNA Isolation from Infected Cells with a Novel Procedure ..	260

T. HATTA AND R. I. B. FRANCKI. Enzyme Cytochemical Method for Identification of Cucumber Mosaic Virus Particles in Infected Cells .....	20
A. H. LU, M. M. SOONG, AND P. K. Y. WONG. Maturation of Moloney Murine Leukemia Virus ...	20
TSUGUHISA KANEKO AND SIGERU KUNO. Selective Isolation of a Thymine-Requiring Mutant of Phage T <sub>4</sub> .....	21
YIH-SHYONG LEE, AKIKO TANAKA, SANDRA SILVER, MARY SMITH, AND MEIHAN NONOYAMA. Minor DNA Homology between Herpesvirus of Turkey and Marek's Disease Virus? .....	21
CHARLES E. SAMUEL. Mechanism of Interferon Action. Kinetics of Interferon Action in Mouse L <sub>929</sub> Cells: Phosphorylation of Protein Synthesis Initiation Factor eIF-2 and Ribosome-Associated Protein P <sub>1</sub> .....	23
VICTOR DEUTSCH, BERNARD MUEL, AND GILBERT BRUN. Temperature-Sensitive Mutant TS 082 of Vesicular Stomatitis Virus. I. Rescue at Nonpermissive Temperature by uv-Irradiated Virus ...	23
ANNOUNCEMENT .....	24
AUTHOR INDEX FOR VOLUME 93, NUMBER 1 .....	24

## NUMBER 2, MARCH, 1979

EDWIN C. MURPHY, JR., DANIEL CAMPOS III, AND RALPH B. ARLINGHAUS. Cell-Free Synthesis of Rauscher Murine Leukemia Virus "gag" and "env" Gene Products from Separate Cellular mRNA Species .....	2
MARTHA M. HOWE, KATHRYN J. O'DAY, AND DENNIS W. SCHULTZ. Isolation of Mutations Defining Five New Cistrons Essential for Development of Bacteriophage Mu .....	3
KATHRYN O'DAY, DENNIS SCHULTZ, WILLIAM ERICSEN, LINDA RAWLUK, AND MARTHA HOWE. Correction and Refinement of the Genetic Map of Bacteriophage Mu .....	3
C. A. CARTER AND B. Y. LIN. Conservation and Modification of the Pyrimidine-Rich Reovirus Oligonucleotides after Infection .....	3
ALLAN TEREBA. Chemical Activation and Regulation of a C-Type Virus from Ring-Necked Pheasant Cells .....	3
L. ANDREW BALL AND CAROL N. WHITE. Nuclease Activation by Double-Stranded RNA and by 2',5'-Oligoadenylate in Extracts of Interferon-Treated Chick Cells .....	3
FELIPE MORENO. On the Trapping of Phage Genomes in Spores of <i>Bacillus subtilis</i> 168. Reciprocal Exclusion of Phages $\phi$ 29 and $\phi$ e during Outgrowth of Spores .....	3
FARANGIS SALEH, GEOFFREY P. GARD, AND RICHARD W. COMPANS. Synthesis of Tacaribe Viral Proteins .....	3
JANICE E. CLEMENTS, OPENDRA NARAYAN, DIANE E. GRIFFIN, AND RICHARD T. JOHNSON. The Synthesis and Structure of Visna Virus DNA .....	3
RICHARD J. MURAL, ROBERT H. CHESNEY, DANIEL VAPNEK, MARTHA M. KROFF, AND JUNE ROTHMAN SCOTT. Isolation and Characterization of Cloned Fragments of Bacteriophage P1 DNA .....	3
P. W. G. CHU AND R. I. B. FRANCKI. The Chemical Subunit of Tobacco Ringspot Virus Coat Protein ..	3
ROBERT VIGNE, MARTIN L. BREITMAN, CARLO MOSCOVICI, AND PETER K. VOGT. Restitution of Fibroblast-Transforming Ability in <i>src</i> Deletion Mutants of Avian Sarcoma Virus during Animal Passage .....	4
TERRY ROBINS AND PETER DUESBERG. Specific RNA Sequences of Rous Sarcoma Virus (RSV) Recovered from Tumors Induced by Transformation-Defective RSV Deletion Mutants .....	4
LINDA HARPER, H. S. BEDSON, AND A. BUCHAN. Identification of Orthopoxviruses by Polyacrylamide Gel Electrophoresis of Intracellular Polypeptides. I. Four Major Groupings .....	4
ZE'EV LEV, ROBERT KAMEN, AND HAIM MANOR. Topography of Polyoma Virus-Specific Giant Nuclear RNA Molecules Containing Poly(A) Sequences .....	4
D. C. JACKSON, T. A. DOPHEIDE, ROBYN J. RUSSELL, D. O. WHITE, AND C. W. WARD. Antigenic Determinants of Influenza Virus Hemagglutinin. II. Antigenic Reactivity of the Isolated N-Terminal Cyanogen Bromide Peptide of A/Memphis/72 Hemagglutinin Heavy Chain .....	4
JOSÉ A. MELERO, DAVID T. STITT, WALTER F. MANGEL, AND ROBERT B. CARROLL. Identification of New Polypeptide Species (48-55K) Immunoprecipitable by Antiserum to Purified Large T Antigen and Present in SV40-Infected and -Transformed Cells .....	4
MAURICE GREEN, JESSE K. MACKEY, WILLIAM S. M. WOLD, AND PATRICIA RIDGEN. Thirty-One Human Adenovirus Serotypes (Ad1-Ad31) Form Five Groups (A-E) Based upon DNA Genome Homologies .....	4

BERT W. SIMPSON, JOHN F. OBJESKI, AND MARY PAT MORRONGIELLO. Conditional Lethal Mutants of Vesicular Stomatitis Virus. III. Host Range Properties, Interfering Capacity, and Complementation Patterns of Specific <i>hr</i> Mutants .....	493
MARY PAT MORRONGIELLO AND ROBERT W. SIMPSON. Conditional Lethal Mutants of Vesicular Stomatitis Virus. IV. RNA Species Detected in Nonpermissive Cells Infected with Host-Restricted Mutants ..	506
MICHAEL R. WINSHIP AND HARSHAD R. THACORE. Inhibition of Vesicular Stomatitis Virus-Defective Interfering Particle Synthesis by Shope Fibroma Virus .....	515
KEEGSTRA, G. N. GODSON, P. J. WEISBEEK, AND H. S. JANSZ. Comparison of the G4 and $\phi$ X174 Phage Genomes by Electron Microscopy .....	527
ED KNAUERT AND ELLIE EHRENFELD. Translation of Poliovirus RNA <i>in Vitro</i> : Studies on <i>n</i> -Formylmethionine-Labeled Polypeptides Initiated in Cell-Free Extracts Prepared from Poliovirus Infected HeLa Cells .....	537
THEL CABOCHE AND CLAUDE LA BONNARDIERE. Vesicular Stomatitis Virus mRNA Methylation <i>in Vivo</i> : Effect of Cycloleucine, an Inhibitor of S-Adenosylmethionine Biosynthesis, on Viral Transcription and Translation .....	547
W. MOZES AND VITTORIO DEFENDI. The Differential Effect of Interferon on T Antigen Production in Simian Virus 40-Infected or Transformed Cells .....	558
SHORT COMMUNICATIONS	
G. S. SCHILD, J. S. OXFORD, AND R. W. NEWMAN. Evidence for Antigenic Variation in Influenza A Nucleoprotein .....	569
L. I. ROMANOVA AND V. I. AGOL. Interconversion of Linear and Circular Forms of Double-Stranded RNA of Encephalomyocarditis Virus .....	574
KEI FUJINAGA, YUKIHARU SAWADA, AND KENJI SEKIKAWA. Three Different Classes of Human Adenovirus Transforming DNA Sequences: Highly Oncogenic Subgroup A-, Weakly Oncogenic Subgroup B-, and Subgroup C-Specific Transforming DNA Sequences .....	578
FRED H. REYNOLDS, JR., ULF R. RAPP, GEORGE J. TODARO, AND JOHN R. STEPHENSON. Replication-Defective S <sup>+</sup> L <sup>-</sup> Moloney MSV Codes for an Envelope Glycoprotein with Moloney MuLV- and MCF-MuLV-Specific Determinants .....	582
DANIEL KOLAKOFSKY. Studies on the Generation and Amplification of Sendai Virus Defective-Interfering Genomes .....	589
C. SCHOLTISSEK. The Genes Coding for the Surface Glycoproteins of Influenza A Viruses Contain a Small Conserved and a Large Variable Region .....	594
J. BOOKOUT, I. HIRSCH, D. J. M. PURIFOY, AND N. BISWAL. Herpes Simplex Virus Types 1 and 2: Comparison of the Defective Genomes and Virus-Specific Polypeptides .....	598
MARION JOHNSON-THOMPSON AND LEONARD J. ROSENTHAL. Inhibition of SV40 Replication by 5-Azacytidine: Effect on DNA Synthesis and Conformation .....	605
THOR INDEX FOR VOLUME 93 .....	609
SUBJECT INDEX FOR VOLUME 93 .....	611

## NOTICE TO AUTHORS

**Editorial Policy.** *Virology* will publish articles on the biological, biochemical, genetic, and biophysical aspects of virus research. All manuscripts should meet the following four basic criteria. *First*, they should report original research results. Manuscripts are accepted for review on the understanding that the same or similar work, wholly or in part, has not been and will not be submitted for publication elsewhere. *Second*, they should report research that is *fundamental*, rather than applied. *Third*, they should report research that is *pioneering* in nature. Authors should clearly understand that space limitations may make it impossible to publish manuscripts that describe work that was performed competently but that does not break new conceptual ground; papers that describe results that have already been obtained with closely related virus or cell systems may be accepted only in exceptional circumstances. *Fourth*, they should be written as concisely as possible, the length being the minimum compatible with a clear presentation and interpretation of the experimental data. Repetition, such as between the Materials and Methods section and figure legends, should be carefully avoided. The Introduction should contain only material relevant to the research that is described; and the Discussion, which should exceed two pages only in exceptional circumstances, should be constructively interpretative and not merely restate the experimental results. Good writing requires careful examination that every word, phrase, and sentence is essential and arranged in logical sequence.

Manuscripts are accepted for review on the understanding that all persons listed as authors have given their approval for the submission of the paper; that any person cited as a source of personal communication has approved such citations; that locally and nationally prescribed safety regulations governing exposure of laboratory personnel and contamination of the environment have been observed; and that all variant virus and cell strains described or mentioned in the paper will be freely available for distribution upon request to a qualified member of the scientific community. Written verification of these conditions may be required at the Editors' discretion. Articles and any other material published in *Virology* represent the opinions of the author(s) and should not be construed as reflecting the opinions of the Editors and the Publisher.

Manuscripts should be submitted in duplicate to the editorial office of *Virology*, 111 Fifth Avenue, New York, N. Y. 10003, by first class mail in flat form.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

**Form of Manuscript.** Manuscripts should be typewritten (not mimeographed), with wide margins on high quality bond paper, using double or triple spacing throughout. Subdivision of articles into *Abstract*, *Introduction*, *Materials and Methods*, *Results*, *Discussion*, *Acknowledgments*, and *References* is recommended. The manuscript must begin with an *Abstract*. In the *Methods* section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiment described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given. Reviews of the literature should be restricted to closely pertinent papers. Tables, figures, names, quotations, and bibliography (and all text references to the same) should be carefully checked for errors. A proposed running head of no more than 37 characters should be included.

**Figures and Tables.** Number all figures consecutively with Arabic numbers and give each one a descriptive legend. All illustrations should be in finished form for the photoengraver. Figures should be planned to fit the proportion of the printed page ( $5\frac{1}{2}'' \times 8''$ , column width:  $2\frac{1}{2}''$ ). Lettering on drawings should be made with a lettering set and should be large enough to take a reduction of 50–60 percent. Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper, if used, should be ruled in blue.

Photographs should be glossy prints with strong contrasts, and the magnification should be indicated by a scale. Photographs should be cropped to eliminate background material so that reproduction might be possible without reduction. Grouping of photographs should be indicated.

Tables should be typed on separate pages, numbered consecutively with Arabic numbers, and collected at the end of the manuscript. All tables must have descriptive headings and should be understandable without reference to the text.

**References.** Names of authors should be mentioned in the text with the year of publication in brackets. References should be listed alphabetically at the end of the paper as follows: Bawden, F. C., and Kassanis, I. (1954). Some effects of thiouracil on virus-infected plants. *J. Gen. Microbiol.* 10, 160–173. See, however, the instructions for *Short Communications* below. The names of journals should be abbreviated according to the *Chemical Abstracts Service Source Index* (1969). References to books should include: author's name, year of publication, title of book (editor of book, if any), edition (if other than first), publisher, and place of publication.

Include in the reference list articles that are "in press," but incorporate in text or use footnotes for "manuscript in preparation," "unpublished observations," and "personal communication."
